Scenario:
You have assigned a group research project to your class. Katalina is in a group, but she has difficulty when she must find information on her own to bring back to the group to support the project. She is familiar with the library and other sources of information, but she does not know how to put everything together so it is useable. eKidSkills and iKidSkills have tools that can support gathering and organizing information for use in research. Find a good tool to use to record new information, its source, and the information type.

This is what a completed Big Picture Card might look like.
